

WIALAN TECHNOLOGIES

WIALAN TECHNOLOGIES SCORES HIGH MARKS IN TEST FOR CABLEVISION - MX

Cablevision in Mexico City has been testing the long range and flexibility of Wialan Technologies Access points, directly attached to the power of their cable system and directly attached to their fiber system, the access point is being fed 100 Mbps to supply the bandwidth in mesh with three other Wialan access points a half of mile from the main access point. The Wialan system is also being tested at the Televisa Building, The Wialan Access point was installed in the roof of the building to provide service to the surrounding gardens.

Let WIALAN TECHNOLOGIES determine your wireless hardware configuration and you see a significant improvement over the area looking to be covered. You will also see a lowering in your power usage resulting in huge savings in your electric bill.
